If you have pre-customised this work section using the "questions and answers" provided as part of the downloading process, it may be necessary to amend some clauses to suit the final project-specific version. The section must still be checked and customised to suit the project being specified, by removing any other irrelevant details and adding project-specific details and selections.

This section relates to the fabrication and installation of **Boundaryline** fencing and gates. It includes:

- Aluminium framed fences and gates with aluminium panels of rails and pickets
- Steel framed fences and gates with timber infill panels or slats
- Steel framed fences and gates with steel infill panels or slats
- Steel mesh fencing panels
- Associated componentry and accessories necessary to complete the system.

Modify / expand this clause to suit requirements of the final version of the section.

This will produce a generic specification. To make the specification specific to your project, select Work Section Support and a pop up will appear to the right of your screen with options to request changes the specification

5

Select EDIT or COMMENT and type in additional information to be sent to our technical team at Boundaryline

Select Submit Request and our team will get back to you regarding the specification
