

ModePanel Arc

ModePanel Arc is a fully welded aluminium fin panel fence system engineered for strength, precision, and architectural appeal.

Designed to deliver a clean, cohesive aesthetic, it provides a modern fencing solution that balances durability with refined style.

ModePanel Arc's defining feature is its streamlined post profiles, which mirror the panel's vertical fins to create a flush, seamless fence line. This alignment removes the visual interruption of traditional square post and panel systems, offering a continuous, architectural rhythm that works beautifully with modern landscapes and building facades.

Features

- Fully welded aluminium fin panels for superior strength and durability
- Streamlined 110x32mm post profiles for a smooth, continuous fence line
- Modular design for fast, precise installation
- Minimalist, architectural aesthetic
- Low maintenance
- Corrosion-resistant finish
- F4 and F9 compliant
- Matching Gates available

Streamlined Posts

110x32mm post profiles for a smooth, continuous fence line
